

Safe People Series – Chapter 9

Outline

What are Safe People?

Now that you've learned all about unsafe people and how to recognize them, it's equally important to know how to identify *safe* people. Safe relationships bring you closer to God, closer to others, and closer to being the person God created you to be. Dr. Cloud lists some descriptions of what safe people are, and shares three aspects of safe relationships that you should look for—modeled after the ultimate safe person, Jesus.

Small group discussion questions:

1) Name some people who have enhanced your life by bringing you closer to God and others, and have helped you become the person you were meant to be.

2) As you examine the second category (dwelling, grace & truth), name people who have been important to you in those areas.

3) What do you need to do – and what do you need to avoid – in order to find these things in other people?
